THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The closest prior art U.S. Patent 6,175,075 B1 to Shiotsuka et al. discloses a photovoltaic cell (fig. 2b) comprising a PV element plate (201), an insulating member (202) provided directly on the PV element plate (201), a collecting electrode (203), which reads on instant coating film by giving the claim broadest reasonable interpretation, provided on an area of the PV element plate (201) on which the insulating member (202) is not provided (see fig. 2b); and an electrode (204) formed on the insulating member, wherein the insulating member has a thickness larger than the average thickness of the coating film (see fig. 2b from which it can be construed that thickness of 202 is larger than average thickness of 203). However, the reference fails to disclose "a thickness of a part of the coating film which is in direct contact with the insulating member is smaller than the average thickness of the coating film."

Another closest prior art U.S. Patent 6,204,443 B1 to Kiso et al. discloses a photovoltaic cell (fig. 2a) comprising a PV element plate (201+202+203+204), an insulating member (209) provided directly on the PV element plate (201+202+203+204), a collecting electrode (205), which reads on instant coating film by giving the claim broadest reasonable interpretation, provided on an area of the PV element plate (201+202+203+204) on which the insulating member (209) is not provided (see fig. 2a); and a terminal (206) which can be interpreted as instant electrode formed on the insulating member (209), wherein the insulating member has a thickness smaller than the average thickness of the coating film (see fig. 2a from which it can be construed that

Art Unit: 1795

average thickness of 205 is larger than the thickness of 209). However, instant claim requires the insulating member (209) to have a thickness larger than the average thickness of the coating film (205), and a thickness of a part of the coating film (205) which is in direct contact with the insulating member (209) to be smaller than the average thickness of the coating film (205).

It would not have been obvious to one of ordinary skill in the art at the time of the invention to have modified Shitsuka in view of Kiso or Kiso in view of Shitsuka to derive the claimed photovoltaic cell wherein the insulating member has a thickness larger than the average thickness of the coating film, and a thickness of a part of the coating film which is in direct contact with the insulating member is smaller than the average thickness of the coating film, because there is not clear and concise teachings as to why one skilled in the art would vary the dimensions. Instant application explicitly teaches that when the insulating member has a thickness larger than the average thickness of the coating film, and a thickness of a part of the coating film which is in direct contact with the insulating member is smaller than the average thickness of the coating film, the creation of internal bubbles during manufacturing process can be avoided such that optical properties are not degraded.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
